Title : IBM Tivoli Identity Manager
V5.1 Implementation

Vendors : IBM

Version : DEMO

NO.1 When migrating IBM Tivoli Identity Manager (Tivoli Identity Manager) from a test to a production environment, which task is valid?

- A. Export all the LDAP user accounts from test to production.
- B. Use the Import/Export feature to migrate the Tivoli Identity Manager configuration.
- C. Assign the Tivoli Identity Manager test server the same host name as the production server.
- D. Copy all the IBM Tivoli Directory Server data files to the Tivoli Identity Manager production system

Answer: B

NO.2 Which statement is true regarding the function that post office configuration can provide?

- A. The post office template can be cloned to reuse as different types of aggregate templates.
- B. It allows a test of aggregation to be performed with chosen notification style from the administrative console.
- C. It controls the volume of e-mail notifications if post office is enabled globally and is not disallowed by Workflow activities.
- D. It provides the capability to configure an alert facility to indicate that e-mail notifications are not being sent to the mail server

Answer: C

NO.3

A new employee has been hired by Company A to fill a new function as a global LDAP administrator. This employee will also be responsible for performing tasks within the payroll system and performing updates in the sales system.

Company A is using IBM Tivoli Identity Manager (Tivoli Identity Manager) v5.1 to provision new users into the corporate information technology resources shortly after they have been hired. Some resources have restricted access and require specific approvals or other information before a new user's account is created.

User accounts will be provisioned for all new users appearing in the identity feed that Tivoli Identity Manager receives on these target systems:

- Active Directory
- Enterprise LDAP User
- Exchange

These target systems require the user's first-line manager's approval before the account is provisioned.

- Payroll
- Human Resources

These target systems require the system owner's approval before the account is provisioned.

- Purchasing
- Sales

These account types for the Enterprise LDAP require approval from the information Technology Risk group. The information Technology Risk group is also required to submit additional information regarding justification for the account:

- Account types
 - # Administrator
 - # Back Operator
 - # Global Administrator
 - # Superuser
- Justification
 - # Replacement support role
 - # New function
 - # Business requirement
 - # Other: Explain

Approvers are given 24 hours to take action on an approval request (either approve or reject). If no action is taken within 24 hours, the approval request is escalated to the Service Desk for manual intervention. The Service Desk will manually reassign the request to a peer approver (as designated in Company A's quarterly organizational chart), if available, or reject the request. Rejection by any one approver will affect only the account under that approver's domain of approval.

The workflow for the new employee is best described by which option?

- A. Accounts for Active Directory, Enterprise LDAP User, and Exchange are provisioned immediately. An approval request is sent to the Payroll system owner for approval of the Payroll account. An approval request is sent to the Sales system owner for approval of the Sales account. An approval

request is sent to the Information Technology Risk group for approval of the Global Administrator account and for justification information.

B. Accounts for Active Directory, Enterprise LDAP User, and Exchange are provisioned immediately. An approval request is sent to the employee's first-line manager for approval of the Payroll account. An approval request is sent to the Sales system owner for approval of the Sales account. An approval request is sent to the Information Technology Risk group for approval of the Global Administrator account and for justification information.

C. Accounts for Active Directory, Enterprise LDAP User, and Exchange are provisioned immediately. An approval request is sent to the peer of the employee's first-line manager for approval of the Payroll account. An approval request is sent to the Sales system owner for approval of the Sales account. An approval request is sent to the Information Technology Risk group for approval of the Global Administrator account and for justification information.

D. Accounts for Active Directory, Enterprise LDAP User, and Human Resources are provisioned immediately. An approval request is sent to the peer of the employee's first-line manager for approval of the Payroll account. An approval request is sent to the Sales system owner for approval of the Sales account. An approval request is sent to the Information Technology Risk group for approval of the Global Administrator account and for justification information.

Answer: B

A. enRole.properties

B. workflowextensions.xml

C. workflowDataSyntax.xml

D. workflowextensions.properties

Answer: B

NO.8 Which two steps are required to independently install IBM Tivoli Directory Integrator (Tivoli Directory Integrator) on a separate computer? (Choose two.)

A. Read the IBM Tivoli Identity Manager (Tivoli Identity Manager) release notes relating to support levels of Tivoli Directory Integrator and fixes required.

B. After Tivoli Identity Manager is installed, the agentless adapters and the adapter profiles are automatically installed on the computer that hosts Tivoli Identity Manager.

C. After Tivoli Identity Manager is installed, the agentless adapters are automatically installed. Manually install the adapter profiles on the computer that hosts Tivoli Identity Manager.

D. After Tivoli Identity Manager is installed, manually install the 5.1 agentless adapters provided with the product on the computer that hosts Tivoli Directory Integrator. Manually install the adapter profiles on the computer that hosts Tivoli Identity Manager.

E. After Tivoli Identity Manager is installed, the agentless adapters are automatically installed on the computer that hosts Tivoli Identity Manager. Import the adapter profiles using the Import/Export facility on the Tivoli Identity Manager administrative console.

Answer: A,D

NO.9 Which two statements are true for service type account defaults? (Choose two.)

A. Account defaults must be hard-coded values or a person attribute.

B. Service type account defaults must be specified for each created service.

C. Service type account defaults are global and are inherited by a service when the service is created.

D. Subsequent changes to the account defaults on the service type are not reflected in existing services.

E. Account defaults for an existing service can be modified by changing the service type account defaults

Answer: C,D

NO.10 The account and password design document indicates that new accounts and passwords are initially set up by a designated security officer. Therefore, the notification is sent to the security officer and is not sent to each account owner. Which two options can be configured to meet this requirement? (Choose two.)

A. Modify the existing e-mail notification templates to add the custom recipient.

- B. Design a new e-mail notification template and add to the list of available workflow notification templates.
- C. Configure a mail node in the operation workflow where the participant is a person with an e-mail account.
- D. The IBM Tivoli Identity Manager administrator would disable the New Account Notification template and the New Password template in Configuration > Properties > Notification Templates.
- E. The IBM Tivoli Identity Manager administrator would disable the New Account Notification template and the New Password template in Configure System > Workflow Notification Properties.

Answer: C,E
